

Baginton Gardeners

By now we are well into Autumn, but there are still a few things you can do to prepare your garden for the spring.

If you have not already done so there's still time to plant some spring bulbs and look forward to them making a colourful appearance in Spring!

Don't forget to protect any tender plants you hope to keep over winter.

You can now plant up some winter containers to add a little colour as the days get greyer!

It's also time to plant garlic and lily bulbs.

It's important that you rake up leaves to prevent the grass being smothered and turning yellow. They can be used as mulch to protect the roots of plants in the garden.

Two practical tasks in preparation for winter are clearing your greenhouse ready for plants that need frost protection and protecting your garden furniture, hoping it will be coming out early in the year for you to enjoy again!

Good luck with your preparations and don't forget to protect any tender herbs that might still be surviving outdoors.

The next meeting is the **Quiz Night** hosted by Tim Jardine from Russell's Garden Centre.
18th November at 7.30

Should be a fun night, so come along to the British Legion, Kimberley Road, Baginton at 7.30.

Visitors are always welcome, visitors pay £4 per meeting.
